

## Superiority of Bio-identical Hormone Gels over BHRT Creams

The Bio-identical Hormone Gels are specially prepared by our Compounding Pharmacists from materials sourced from world famous FDA approved Pharmaceutical companies.

We have an ISO certified clean room facility and a licensed compounding pharmacist on staff. The bulk powders for the active ingredients are produced in a US FDA inspected facility and the Bio-identical Gels are made in an ISO certified clean room that meets WHO standards. The benefit of our Bio-identical Hormones is that there is a wider range of dosages and formulations available at very low cost without any compromise in quality.

The Bio-identical Hormones available from other Compounding pharmacies are made from a base of synthetic chemical cream with chemicals (like Polyethylene Glycol or Propylene Glycol, etc.) and chemical preservatives added to it.

In comparison, the Bio-identical Hormone Gels provided by our pharmacy, are made from pure natural Aloe Vera Gel base and do not contain any chemical preservatives in them. We have diffused Nano silver particles in the gels which serve as preservatives due to the anti-bacterial, antifungal and antiseptic properties of Nano silver. All the ingredients of our Gel are from plant origin and / or fall in the category of Generally Recognized As Safe (GRAS). Our Gels are free of toxic materials like Mercury, Lead, Nickel, etc.

Bio-identical Hormones available from other Compounding Pharmacies are dispensed in Syringes, which makes it difficult for lay and non scientific patients to use them and dose themselves correctly. Our Hormone Gels are dispensed in squeeze bottles which makes it possible to apply numerous micro doses of hormone laden gels and to vary the doses as per each person's individual requirements and also as per the day of the cycle. The patient is advised to listen to their body and do what feels right for them.

We have shipped over 100,000 Gels to over 10,000 satisfied patients all over the world during the last decade and have the experience that goes with this long period of association with the science of Bio-identical Hormone Therapy.

No animals were used in the testing of our Bio-identical Hormone Gels

In addition our Gels are very attractively priced and are far below the cost of similar products from other Compounding Pharmacies.

We also offer 24 X 7 support to Physicians all over the world in the evolving subject of Endocrine Imbalances of all types and other chronic ailments.

All this makes our Gels far superior to those manufactured by other Compounding Pharmacies in the world.

### Customer Comments:

Received my order and want to thank you for your fine service.....

i have ordered 3 bio-identical hormones and observe the difference between the compounded versions from this country and your version, which is beautifully packaged, very refined and thorough in the accompanying explanatory information....

very appreciated...

i am curious about the shelf life of the bio-identical compounds....

i also like the mailing envelop and the lovely stamps....

thanks  
dk

**Doctor's Comments:**

We really enjoyed meeting with you at the recent Anti-Aging Medical Conference. We are very excited about all we learned and look forward to our personal consultation with you about our personal health.

Because we are OB/GYNs, we want to quickly begin implementing the transdermal hormone therapy into our practice. Many of the American compounding pharmacies that we saw are still using cream filled syringes.

We are very excited to work with you. Your costs are well below everyone else. I can't wait to talk with you on the phone. If I don't answer straight away its only because I'm in a C-Section or delivery. Otherwise I can answer 24 hours a day.

Talk to you soon.

DK, M.D. FACOG

OB/GYN

**Patient Comments:**

Wonderful news, I am only using your hormone gel, and I am feeling very centered and positive. The gel seems to be more effective than the Progesterone capsules I was taking in the past. I even spotted this cycle. I feel very hopeful. So thank you. The world needs more caring and knowledgeable Doctors like you.

Ms. H
